

IN THE CLAIMS:

The pending claims are set forth below and have been amended and/or cancelled, without prejudice, where noted:

1. (Currently Amended) A polypropylene comprising a propylene polymer having no peroxide residue and having a melt flow of at least about 300 g/min from about 300 g/10 min. to about 400 g/10 min. and a xylene solubles of not more than about 3.5%, and wherein the propylene content of the polymer is from 99.5 to 100% by weight of polymer.
2. (Original) The polypropylene of claim 1, wherein the polypropylene has a xylene solubles of from about 1% to about 3.5%.
- 3-4. (Cancelled)
5. (Currently Amended) The polypropylene of claim 1, wherein the polypropylene has a melt flow of from about at least about 350 g/10 min to about 400 g/10 min.
6. (Cancelled)
7. (Original) An article formed from the polypropylene of claim 1, wherein the article is selected from a group consisting of a polypropylene fiber, a textile material, a diaper, a feminine hygiene product, an automobile bumper fascia, exterior or interior trim or body panel, an internal or external appliance component or trim, a drape, a gown, a mask, a glove, food packaging, a cup, a plate, a bowl, and a food container.
8. (Original) A material formed from the ultra high melt flow polypropylene of claim 1, wherein the material is selected from the group consisting of a coating material for applying a substrate and a binder material.
